

1) Alfred and Beth exchange their keys and file ID out-of-band

2) Alfred queries DHT for middle-men that will be up at the same time as his laptop L; DHT is updated

3) When online, Alfred's laptop L privately sends chunks of his file to M<sub>1</sub>, M<sub>2</sub> and M<sub>3</sub>

4) Beth queries the DHT for middle-men's addresses & fetches the file's chunks when they are available
